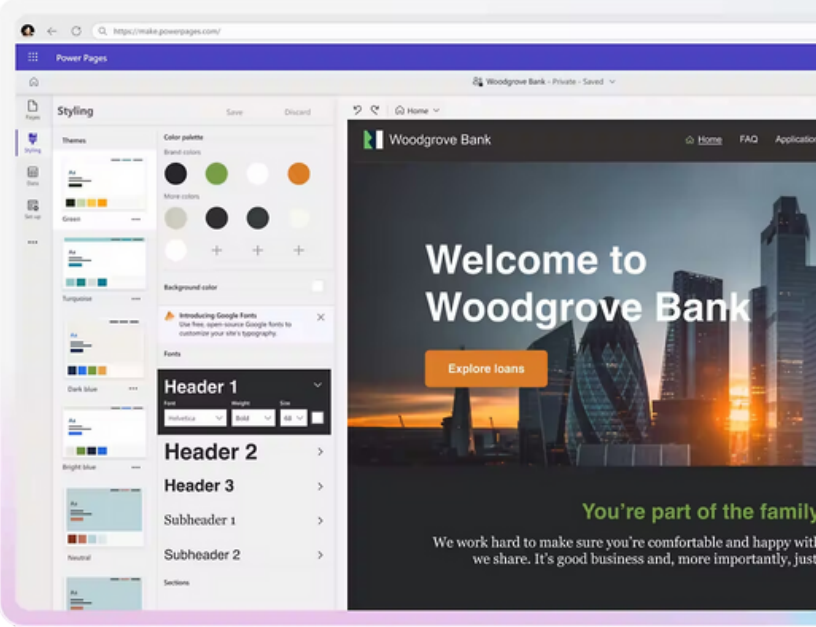
MICROSOFT POWER PAGES

Your Low-Code Website Builder

Microsoft Power Pages is a secure, enterprise-grade, low-code software as a service (SaaS) platform for creating, hosting, and administering modern external-facing business websites. Whether you're a low-code maker or a professional developer, Power Pages empowers you to rapidly design, configure, and publish websites that work across web browsers and devices.

Design Engaging Websites

Get the ease of drag-and-drop design with no-code components including images, videos, lists, and forms.

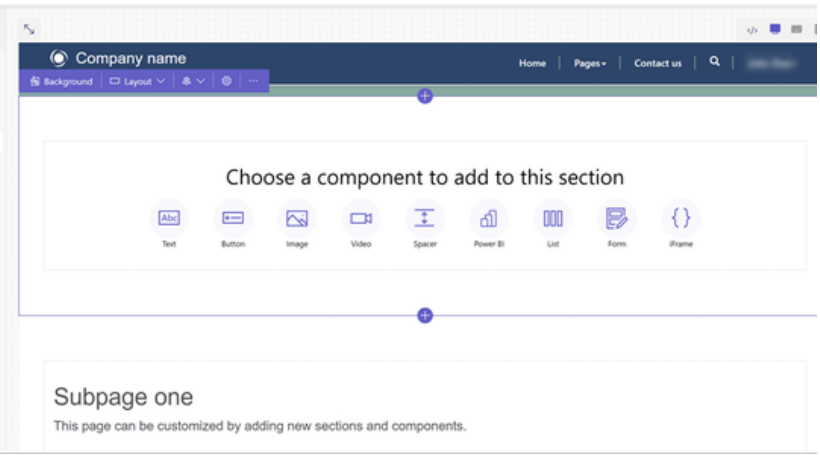


Get Up and Running Quickly

Start with a default template to quickly create websites for FAQ scheduling, registration, and application submission.

Share Business Data

Manage your business data by storing it in Microsoft Dataverse and creating tables using the data workspace.



Develop with Pro Tools

Add deeper functionality and capabilities to websites using tools such as Visual Studio Code, GitHub, and Azure DevOps.

Strengthen Security

Mitigate security concerns through advanced encryption, rich role-based access controls, and support for web application firewalls.
