

# VENA CONNECTOR

*Providing The Bridge Between Dynamics GP & Vena*

Opal's Vena Connector for Microsoft Dynamics GP is a powerful solution for automation and reconciliation of key financial data. The connector parses, formats, and transfers your financial information on a schedule you define.

## HOW DOES IT WORK?

The Vena Connector is configured with users credentials that run a Windows Scheduled Task which then executes a procedure to create the extract files on the desired frequency. The procedure can be adapted for each customer in order to provide the required data to Vena.

## Currently Supported:

- GL Transactions Extract
- Cash Sub-Ledger Extract
- GL Beginning Balances Extract
- Accounts Payable Sub-Ledger Extract
- Account Reconciliation Sub-Ledger Extract
